Univox® CTC

Cross the Counter Systems for counters, desks and cashiers

Features

- Correctly installed and adjusted system complies with the industry standard IEC 60118-4
- Reliable, powerful amplifiers guarantee problem free functionality
- Dual action AGC supplies excellent speech perception and eliminates pumping effects
- Compensation for long microphone distance:
  AGC with very large input range (70dB) guarantees smooth sound level
- Low overspill due to defined spreading:
  at 1.5 m from the middle of the desk the magnetic field is reduced more than 33dB
- Smallest distance between 2 systems is 1 meter
- Amplifier equipped with LED for function control
- User friendly - system works automatically without the need of any adjustment

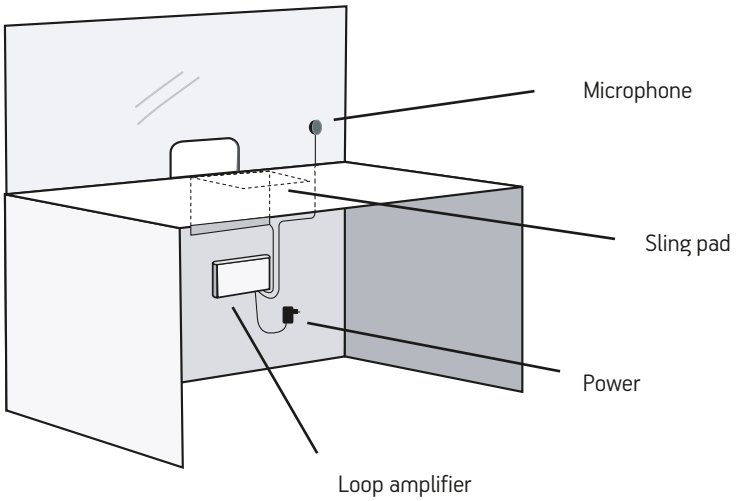

No more communication problems, thanks!

Just add the goose neck microphone to our compact loop amplifier - consider it said and done!

Univox® CTC systems (Cross the Counter systems) are complete induction loop systems for installation in receptions, information desks, supermarket cashiers and ticket booths. All systems include induction loop amplifier, microphone and loop pad. When installed, the systems grant for hearing aid users to communicate with the staff with high speech perception.

Choose between a goose neck microphone and a small self-adhesive microphone which can be mounted on a glass or a wall. Every Univox® CTC system includes a loop pad which is mounted under the counter/desk.

The reliable and powerful amplifiers, equipped with a modern and intelligent AGC function, supplies excellent speech perception in any situation. Correctly installed the system works automatically without any settings or adjustments.
