EJ-7XT Plus is a professional and reliable pocket transmitter in a robust aluminium casing. It operates with wireless pocket receiver EJ-7R and diversity receivers in the EJ-700 series. It has 16 selectable channels and 4 transmitters can be used simultaneously in the range. To be used with headsets or tie clip microphones.

Univox – co-developed with OKAYO

Univox and Okayo have co-developed a number of Okayo's standard products, for example body pack transmitters and receivers, to improve speech intelligibility for hearing aid users. To comply with accessibility requirements and provide a good audio experience even for the hearing impaired, make sure you use these special developed products.
